Speculative Working Space

Office case study

Choosing Karndean Designflooring for your client's board room, reception area or open-plan office helps create a stylish and inspiring working environment. What's more, your facility managers will be delighted with Karndean's durability, ease of maintenance and BRE Global Green Guide rating.

Millstone Sycamore belongs to the acer family, along with maple, and features many of the same characteristics. It has a fine, close texture and in its natural form tends to be a light, almost white colour, making it an ideal colour carrier. Millstone Sycamore features ivory tones that make it ideal for contemporary spaces where a more neutral floor colour is desired.

The Van Gogh wood effect flooring collection is popular in commercial environments such as corporate and offices. Its large wood planks capture the character of real timber and are quick to lay. Distinctive grain details and a subtle texture create a look that works in almost any space. The latest refresh introduced on-trend wood floor effects. Try combining plank sizes, styles, or shapes with our gluedown collection to create zones, walkways, or areas of interest.

Alternatively, match texture and colour to create a tonally blended floor using our rigid core designs and, in the process, reduce installation time significantly.

Imagery and Design Reproduction

Photography and print cannot always produce a perfect representation of our products. This includes colour, pattern variation and installation elements used. For this reason we strongly recommend obtaining a product sample and where possible viewing a larger sample in-store. We also recommend visiting our website for information on installation, after care and product selection: www.karndean.com/advice. We love developing new ideas and improving on our existing designs which means that sometimes products are withdrawn at short notice. We hate to disappoint and will work with you to find an alternative design. Please contact Customer Service for more information.
